This DNA package does not include tests for Episodic Falling Syndrome (test code H674), HNPk (SUV39H2 gene, test code H675), or Lafora Disease (test code H468). However, these tests can be added as optional 'add-ons' during the ordering process. Before placing your order, please verify that all required DNA tests for your breed are included in the package.

VHLGenetics/CombiBreed cannot be held responsible for any missing genetic tests. We strive to keep this package as up to date as possible. However, since our laboratory does not receive automatic updates from the Flemish government when breeding regulations (rasfiches) change, it is possible that certain tests may be missing. If you notice that any mandatory or recommended DNA tests for your dog breed are not included, please don't hesitate to let us know.
